

Ranking the schools

Important notes to the rankings

In this table, schools are ranked (on the left side of the page) in descending order (from 1 to 1,013) according to their academic performance as measured by the *Overall rating* (shown on the right side of the table) for the school year 2003/2004. Each school's five-year average ranking and *Overall rating* are also listed. The higher the overall school rating (out of 10), the higher the rank awarded to the school. Where schools tied in the *Overall rating*, they were awarded the same rank. Where fewer than four years of data were available, "n/a" appears in the table.

Not all the province's elementary schools are included in the tables or the ranking. Of all the

schools in the province reporting FSA results, 1,013 are included in this *Report Card*. Included are schools that enrolled at least 15 students in both grade 4 and grade 7. Also included are eligible schools (noted in this table with a double asterisk) whose students advanced to a middle school after grade 5 or grade 6 (see "Key academic indicators of school performance" on page 6). Excluded are those schools—including the province's francophone schools—that did not generate a sufficiently large set of student data to enable the calculation of an *Overall rating* for the school year 2003/2004.

The exclusion of a school from the *Report Card* should not be considered a judgment of the school's effectiveness.

| Provincial rank | | School name | City | Overall Rating | |

Appendix: Calculating the Overall rating out of 10

The *Overall rating out of 10* is intended to answer the question, “In general, how is the school doing, academically?” The following is a simplified description of the procedure used to convert the data received from the ministry of education into the *Overall rating*.

- 1 Subject by subject, the average Foundation Skills Assessments (FSA) test scores for each school were standardized by calculating Z , which is defined by:

$$Z = (X - \mu) / \sigma$$

where X is the individual school’s result, μ is the mean of the all-schools distribution of results, and σ is the standard deviation of the same all-schools distribution.

- 2 The gender gap scores in grade-7 reading and grade-7 numeracy were each determined by calculating the absolute value of the difference between the average score for girls and the average score for boys. The results for each subject were then standardized.
- 3 The nine standardized indicator results were then combined to produce a weighted average summary standardized score for the school. The weights used in making this calculation for the FSA test scores from 2003 were: average scores for each of the six tests—8.3%; gender-gap scores for each of the grade-7 reading and grade-7 numeracy tests—10%; and, percentage of tests below expectations—30%. For schools for which there were no gender-gap results, the average scores for each of the six tests were given a weight of 10.4% and the percentage of tests below expectations was weighted at 37.5%.

In making this calculation for the FSA test scores from 2001 and 2002, the weights used were: average scores for each of the six tests—13.3%; gender-gap scores for each of the grade-7 reading and grade-7 numeracy tests: 10%. For schools for which there were no gender-gap results, the average scores for each of the six tests were each given weights of 16.7%.

In making this calculation for the FSA test scores from 2000, the weights used were: average scores for each of the four tests—20%; gender-gap scores for each of the grade-7 reading and grade-7 numeracy tests: 10%. For schools for which there were no gender-gap results, the average scores for each of the four tests were given weights of 25%.

- 4 This summary standardized score was re-standardized.

This standardized score was converted into an overall rating between 0 and 10 as follows:

5 The allowable maximum and minimum standardized scores were set at 2.2 and -3.29 respectively. Scores equal to, or greater than, 2.2 receive an overall rating of 10. This cut-off was chosen because it allows more than one school in a given year to be awarded 10 out of 10. Scores of equal to, or less than, -3.29 receive the lowest overall rating of 0. Schools with scores below -3.29 are likely to be outliers, a statistical term used to denote members of a population that appear to have characteristics substantially different from the rest of the population. We chose, therefore, to set the minimum score so as to disregard such extreme differences.

6 The resulting standardized scores were converted into overall ratings according to the formula:

$$OR = \mu + (\sigma * \text{StanScore})$$

where OR is the resulting Overall rating, μ is the average calculated according to the formula:

$$\mu = (OR_{\min} - 10 (Z_{\min} / Z_{\max})) / (1 - (Z_{\min} / Z_{\max}))$$

where σ is the standard deviation calculated according to the formula:

$$\sigma = (10 - \mu) / Z_{\max}$$

and StanScore is the standardized score calculated in (4) above and adjusted as required for minimum and maximum values as noted in (5) above. As noted in (5) above, OR_{\min} equals zero, Z_{\min} equals -3.29 ; and Z_{\max} equals 2.2.

7 Finally, the derived overall rating is rounded to one place of the decimal to reflect the significant number of places of the decimal in the original raw data.

Note that the *Overall rating out of 10*, based as it is on standardized scores, is a relative rating. That is, in order for a school to show improvement in its overall rating, it must improve more than the average. If it improves, but to an extent less than the average, it will show a decline in its rating.

About the authors and Acknowledgments

Peter Cowley

Peter Cowley is the Director of School Performance Studies at The Fraser Institute. Upon graduation from the University of British Columbia (B.Comm. 1974), Mr Cowley accepted a marketing post with Proctor and Gamble in Toronto. Shortly thereafter, he returned to Vancouver to begin a long career in marketing and general management in the furniture-manufacturing sector. During his assignments in general management, process improvement was a special focus and interest. In 1994, Mr Cowley wrote and published *The Parent's Guide*, a popular handbook for parents of British Columbia's secondary-school students. The Parent's Guide web site replaced the handbook in 1995. In 1998, Mr Cowley was co-author of The Fraser Institute's *A Secondary Schools Report Card for British Columbia*, the first of the Institute's continuing series of annual reports on school performance. This was followed in 1999 by *The 1999 Report Card on British Columbia's Secondary Schools; Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools*; and *The 1999 Report Card on Alberta's High Schools*. Since then, Mr Cowley has co-authored all of the Institute's annual *Report Cards*. Editions published in 2004 included *Report Cards* on secondary schools in British Columbia, Alberta, Quebec, and New Brunswick and *Report Cards* on elementary schools in British Columbia, Alberta, and Ontario. The *Report Card on Aboriginal Education in British Columbia* was also introduced in 2004. He continues his research on education and related issues for The Fraser Institute.

Stephen T. Easton

Stephen T. Easton is a professor of Economics at Simon Fraser University and a Senior Scholar at The Fraser Institute. He received his A.B. from Oberlin College and his Ph.D. from the University of Chicago. Recent works published by The Fraser Institute include *Privatizing Prisons* (editor, 1998), *The Costs of Crime: Who Pays and How Much? 1998 Update* (with Paul Brantingham, 1998), and *Rating Global Economic Freedom* (editor, 1992). A co-author of *A Secondary Schools Report Card for British Columbia* (1998), *Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools* (1999) and the *Report Card on Aboriginal Education in British Columbia* (2004), he has continued to co-author the *Report Cards* of British Columbia, Alberta, New Brunswick and, most recently, Ontario. Other publications about education include "Do We Have a Problem Yet? Women and Men in Higher Education," in David Laidler (ed.), *Renovating the Ivory Tower: Canadian Universities and the Knowledge Economy* (Toronto: C.D. Howe Institute, 2002), pp. 60–79; "Plus ça change, plus c'est la même chose" in Stephen B. Lawton, Rodney Reed, and Fons van Wieringen, *Restructuring Public Schooling* (Berlin: Springer-Verlag, 1997) and *Education in Canada: An Analysis of Elementary, Secondary and Vocational Schooling* (Vancouver: The Fraser Institute, 1988). His editorials have been carried by the *Vancouver Sun*, the *Globe and Mail*, the *National Post*, the *Ottawa Citizen*, the *Stirling chain* and many other newspapers around the country.

Acknowledgments

The Fraser Institute wishes to acknowledge the generous support for this project from the Lotte and John Hecht Memorial Foundation.
